## April brings good news for win.rar GmbH

win.rar GmbH continues to experience ongoing success with each month. Sales have risen another 4% in April 2003 making a total increase of 117% since the first month of operation in April 2002.

Contributing to impressive sales for April 2003, was the sale of four unlimited national licenses. An unlimited national license allows use of WinRAR on an unlimited number of PCs within an entire company in one country.

The April purchasers of these unlimited national licenses include a mobile communications company in Italy, an insurance company in Germany; a banking institution in Russia; and a section of the French Government.

In response to the sales increase in April 2003, Managing Director Burak Canboy states: "It is a pleasure to see that we were able to surpass the sales from December at such an early point in the year. WinRAR is gaining entry to some major companies at the moment." With regards to the future Canboy noted: "Our focus is on entering new markets and discovering new channels of distribution. We are certain that by word-of-mouth and recognition purchase of WinRAR will only continue to rise."
